

ETHICS OF GLOBAL DEVELOPMENT

AGENCY, CAPABILITY, AND DELIBERATIVE DEMOCRACY

David A. Crocker
University of Maryland

Poverty, inequality, violence, environmental degradation, and tyranny continue to afflict the world. *Ethics of Global Development* offers a moral reflection on the ends and means of local, national, and global efforts to overcome these five scourges. After emphasizing the role of ethics in development studies, policymaking, and practice, David A. Crocker analyzes and evaluates Amartya Sen's philosophy of development in relation to alternative ethical outlooks. He argues that Sen's recent turn to robust ideals of human agency and democracy improves on both Sen's earlier emphasis on 'capabilities and functionings' and Martha Nussbaum's version of the capability orientation. This agency-focused capability approach is then extended and strengthened by applying it to the challenges of consumerism and hunger, the development responsibilities of affluent individuals and nations, and the dilemmas of globalization. Throughout the book the author argues for the importance of more inclusive and deliberative democratic institutions.
